

PANEL FABRICATION CAPABILITIES

Nearly 15 years of experience in panel fabrication offers clients a diverse range of turnkey offerings and expertise for commercial, industrial and utility applications.

From start to finish, ES Boulos (ESB) has the capability to provide engineering, document review, design, procurement, fabrication, testing/commissioning, delivery and installation services for a range of cabinet needs to clients nationwide.

We specialize in the designed assembly of protection and control relay cabinets, as well as PLC and motor control assemblies, pneumatic control packages, automation and control systems, termination enclosures, CCVT cabinets, SCADA cabinets, and custom enclosures. We can also supply and ship completely fabricated control houses as well as skid mounted control assemblies.

Our in-house capabilities have allowed us to maintain greater control with regards to cost, quality, efficiency, and flexibility of offerings; and we extend these benefits to our many engineering and utility clients served throughout the northeastern U.S., for whom ESB is an approved vendor.

We regularly partner with local engineering firms to provide engineered capabilities as requested by clients, which allows us the adaptability needed for developing customized solutions for clients.

Prior to delivery, factory acceptance testing is conducted by third-party engineering firms to ensure every cabinet fabricated by ESB meets rigorous quality, safety and performance standards. Feedback received consistently validates that ESB is producing a top-notch product, and virtually every cabinet has been free of defects before shipment.

“At ESB, we pride ourselves on delivering quality and efficiency to our clients, and have refined our abilities to produce a safe, quality product in a timely manner.”

MARTIN BROWNE, Vice President of Operations

Today, ESB operates a state-of-the-art, 7,000 square-foot, climate controlled, UL 508A listed facility out of our utility division headquarters in Auburn, Maine. The facility provides a comfortable, spacious and clean working environment for our IBEW-qualified employees, is equipped to handle large orders seamlessly, and has plenty of room for ESB to grow and expand our panel fabrication offerings.

Keeping clients in the loop throughout every step of fabrication is key, especially when changes are required. We acknowledge that changes made on our end can impact them considerably, so we take every step to ensure that they are kept abreast of every detail."

ALAN LOVEJOY, Panel Fabrication Manager

Alan Lovejoy (on right) is ESB's Panel Fabrication Manager. He brings over 20 years of electrical field and technical experience working for ESB as both an electrician and general foreman. This experience has provided him with extensive knowledge related to the needs and requirements of ESB's top utility and commercial customers.

Our IBEW-qualified employees have mastered supreme attention to detail, allowing them to identify errors in design drawings and bring them to the attention of engineers and clients, and troubleshoot accordingly to find appropriate solutions.

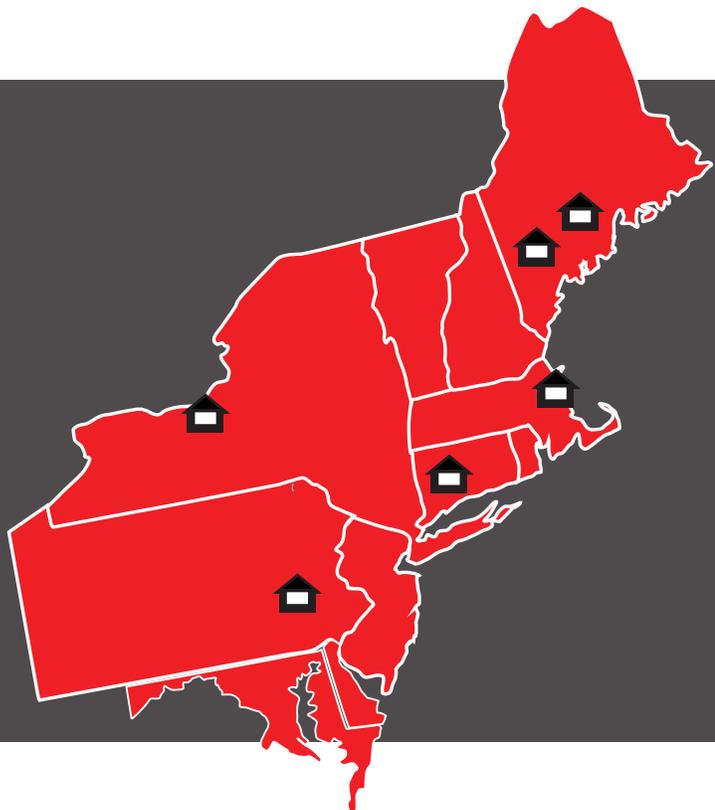

SAMPLE CLIENTS

Iberdrola USA
