

**UTILITY SERVICE** CAPABILITIES

---

*With decades of industry management and knowledge, ESB's team of smart, creative and skilled professionals complete commercial, industrial, utility and telecommunication projects of every size and scope.*

---

## Nearly 100 years of experience in electrical construction offers clients a diverse range of turnkey offerings

**E.S. Boulos Company (ESB) is among the oldest, largest, and most experienced electrical contractors in New England.**

Founded in 1920, ESB has established a reputation for quality, safety and value that makes them a contractor of choice for major electrical construction projects throughout Northern New England and beyond.

ESB has two divisions, offering both power line construction and commercial/industrial electrical construction, making us a full service electrical provider.

Our power line construction division provides a full-range of capabilities related to transmission, distribution and substation construction.

Our professionals effectively utilize the most innovative construction industry techniques and platforms to efficiently meet project requirements - from pre-construction planning to integrated project delivery, and from value engineering to commissioning. Highly experienced project management and field crews consistently surpass project performance milestones meeting even the most difficult logistical challenges with on-time, on-budget performance.

*"We pride ourselves on delivering quality and efficiency to our clients, and have refined our abilities to produce a safe, quality product in a timely manner."*

**MARTIN BROWNE**, *Vice President of Operations*

Our experience on projects throughout New England, familiarity with the region, and excellent performance record enables us to be a strong team in the successful execution of your projects.
