

COMMERCIAL & INDUSTRIAL SERVICE CAPABILITIES

Nearly 100 years of experience in electrical construction offers clients a diverse range of turnkey offerings and expertise for commercial and industrial applications.

From start to finish, ES Boulos (ESB) has the capability to provide engineering, document review, design, procurement, fabrication, testing/commissioning, delivery and installation services for clients nationwide.

E.S. Boulos Company (ESB) is among the oldest, largest, and most experienced electrical contractors in New England.

Founded in 1920, ESB has established a reputation for quality, safety and value that makes them a contractor of choice for major electrical construction projects throughout Northern New England and beyond.

E.S. Boulos has two divisions, offering both power line construction and commercial/industrial electrical construction, making it a full service electrical provider. E.S. Boulos' powerline construction division provides a full-range of capabilities related to transmission, distribution and substation construction.

E.S. Boulos' commercial and industrial electrical construction division specializes in large-scale commercial electrical projects, telecommunications, traffic signalization, gas distribution, high voltage distribution service and maintenance to clients. E.S. Boulos also offers design-build and pre-construction services and has in-house pre-fabrication and AutoCAD capabilities.

“At ESB, we pride ourselves on delivering quality and efficiency to our clients, and have refined our abilities to produce a safe, quality product in a timely manner.”

MARTIN BROWNE, Vice President of Operations

ESB is a leader in the C&I industry in the Northeast. We have recently completed the new Maine General Hospital in Augusta, Maine which was an extremely successful IPD project. We are currently working at Eastern Maine Medical Center on their new state of the art, 8-story Medical Tower project. Our experience makes us the go-to contractor for electrical and telecommunication installations in commercial and industrial facilities.

ESB's team of professionals effectively utilize the most innovative construction industry techniques and platforms to efficiently meet project requirements - from pre-construction planning to pre-fabrication, from Design/Build contracting to Integrated Project Delivery, and from value engineering to electrical system testing and commissioning. Highly experienced project management and field crews consistently surpass project performance milestones meeting even the most difficult logistical challenges with on-time, on-budget performance.

Electrical Construction Services

- Estimating
- Building Information Modeling (BIM) – AutoCad MEP, Revit and Navisworks
- Design/Build
- Integrated Project Delivery
- Fire Alarm Systems
- Power & Control Wiring – High, Medium and Low Voltage
- HVAC Control Wiring
- Distributed Control
- High Voltage Insulation Termination & Testing
- Lighting & Lighting Control Systems
- Pre-Fabrication
- Tele /Data Installation
- Solar Panels

Markets Served

- Biotechnology
- Bridges & Transportation Facilities
- Corporate/Commercial Facilities
- Educational Facilities
- Entertainment / Casinos / Civic Centers
- Hotels
- Manufacturing
- Municipal Facilities
- Pharmaceutical
- Pulp & Paper Mills
- Renovations, Expansions, Betterment Projects
